

Clark Forklift Parts

Performing worldwide, there are at this time 350,000 Clark forklifts and lift trucks in operation, with upwards of 250,000 of those in use in North America. Clark has five major lines of lift trucks across the globe, making it one of the most expansive corporations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are a few of their specialties. Clark Totalift, handles more than 120,000 particular components designed for 20 unique designs of lift trucks and automated equipment. Your regional Clark Dealer is your total source for availability of all your components needs offered by Clark Totalift. Clark's extraordinary Parts Distribution Centers are conveniently situated in Louisville, Kentucky, which serves both their consumers and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and consumers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Driven to provide the highest level of value and service to our clients, Clark remains on the leading edge when it comes to improving efficiency and benefiting performance. Globally, Clark has one of the most amazing supplier support networks. With over 550 locations worldwide, dealer representation in over 80 countries and 230 locations in North America, their high level of commitment to their clients predominates the materials handling industry. Clark proudly remains an innovative leader of the material handling industry, revolutionizing safety features such as the worker restraint system. This exceptional commitment to safety is at this time a standard feature on every lift truck. Clark's relentless effort to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first forklift maker across the world to be certified with the internationally approved quality standard ISO 9001 for all of their manufacturing plants. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any environmental limitations, thus placing them in a prevailing market position. Clark has chosen the extremely economical and beneficial system of "Lean Production" for its assembly facilities and application of resources. This structure was developed to acknowledge the most efficient method of manufacturing facility stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies. Clark's product engineers and suppliers join together to enhance the effectiveness and brilliance of their merchandise while minimizing costs. The contemporary value engineering program combines innovative product growth and provides improved customer support and service within the industry.
