

Concrete Hoppers

This attachment is a self-dumping hopper that automatically starts to unload whenever bumper release touches the side of a dumpster. Once unloading is completed, the hopper goes back to a locked and upright position. This piece of equipment also comes together with a cable which enables operation from the seat of the lift truck so as to have the alternative of manually dumping the hopper. There is a locking chain provided in order to lock the hopper to the tine truck. This particular product is constructed with reliable and consistent robotic welds for utmost strength. The lift truck dumping hopper also has a blue powder coat finish to be able to maintain durability.
